

Hello everyone,

I hope this letter finds everyone in good health and in good spirits. My... how the world can change in a month! We have seen the Covid-19 virus make our whole world put the brakes on life. Some places have been affected more than others, but it has affected just about everyone on the planet. Our spring and summer plans have been turned upside down and we've had to cancel a lot of our trips for the time being. Still, God is good! We are being taken care of. We have tree jobs to support ourselves, food on the table, and a roof over our heads. We'd much rather be flying for God right now, but we're going to trust Him that His timing is perfect.

I could go into speculation as to what exactly the world is going to look like on the other end of this virus outbreak, but the reality is that we don't know for sure. I will say that

events like this will prompt the lamblike beast of Revelation 13 to form an image to the first beast, ruling over both secular and religious matters. Read pages 589 and 590 in "*The Great Controversy*" (by Ellen G. White) and see if things don't start to sound like our current world. The very things written there have already been more than strongly suggested and an understanding of prophetic events which has been held for roughly 170 years will soon see it's fulfillment right before our eyes. We don't know exactly when, but the situation is ripe.

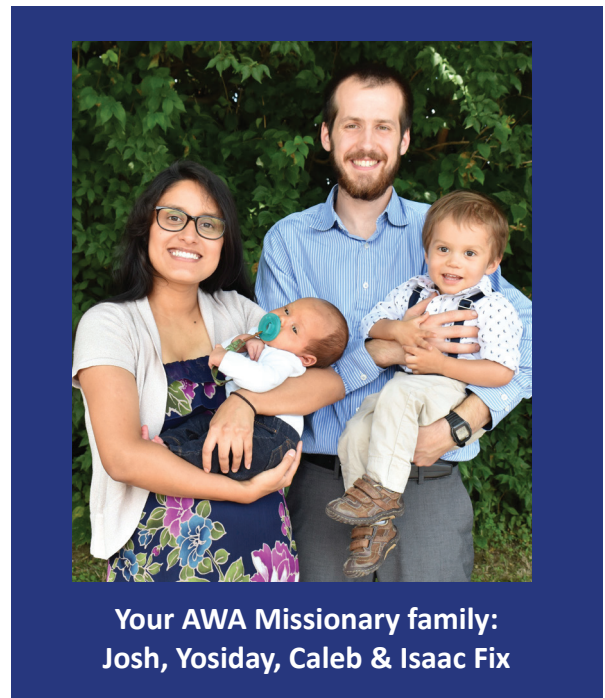

The question for us is, "are we *ripe*?" Are we ready for the Heavenly Reaper? Are we hidden in the cleft of the rock? Will we be able to stand at the brightness of His coming? Are we sharing the 1st, 2nd, and 3rd angels' messages calling on us to worship God as our Creator, accepting Christ as our Savior and rejecting apostate Christianity in all its forms?

We have been given a message of hope - a message of a soon-returning Savior. Let's do all we can in our sphere of influence to share this message of hope that this world is not all there is. There are still many people in this world who do not have this hope. Many of those people live in hard to reach places around the world. That is why AWA exists... to share these truths. We serve people's physical needs in a practical way, win their friendship, and then invite them to know the love Jesus has for them. We share the unique Adventist end time message for this world given to us by Christ Himself. Keep the faith and remember who you are in God's eyes in this important point in time.

Thank you for your prayers and financial partnership with us to serve as God has called us.

God bless you!

Josh, Yosiday, Caleb and Isaac Fix

Your AWA Missionary family:
