

UNLOCKING POTENTIAL

We started a literacy program for these young kids and out-of-school adults on February 22, 2026. It's been almost 3 months since our volunteer teachers have been dedicating their time and effort to helping these eager-to-learn people. We at AWA Philippines are also supporting the initiative by providing learning materials, such as Bible coloring activity worksheets, art materials, and other resources we can think of to help the ministry.

Upon hearing the stories of the volunteer teachers from LIGHT Ministries, I felt blessed by the drastic change the program brought to their

By Mark Cabural, Adventist World Aviation-Philippines lives. The students were initially hesitant to attend our Friday and Sunday classes. Still, as time went by, with God's help, they opened their hearts and minds to receiving both God's Word and academic teachings that would surely help them. I was also happy to see those people wearing big smiles as they learned happily with their fellow students.

We are also blessed to have known the School Head of the nearby Elementary School for his support and for considering us. We are planning to have a Vacation Bible School/Summer Reading Camp at the school he was assigned to. This will be a joint effort of Sagpangan Elementary School, Adventist World Aviation Foundation Inc., and LIGHT Ministries, in hopes of spreading God's Word through Bible stories and further helping young kids with their reading skills and comprehension.

Our Literacy Program still needs a couple of essential items to enhance the learning experience for these people. We need a total of \$200 to purchase 2 large whiteboards, whiteboard markers, printer ink, notebooks, papers, pencils, ballpoint pens, coloring materials, and snacks for classes.

Thank you for always supporting God's ministry through Adventist World Aviation! We are planting seeds of hope for these people in Sagpangan, Aborlan. Seeds of learning that eventually help them have a better status in life, and seeds of faith, hope, and love that someday soon we will reap as we nurture them to be a good steward of God also.

PHILIPPINES PROJECT NEEDS:

- Computer upgrade (for the office) - \$400
- Hangar flooring, installation, power & water source - \$1,900
- Repair of our Nissan Frontier model 2001 - \$1,800
- New printer - \$200
